

Basics

Atoms	Basic Building Blocks, Most simple Components	Headings, Links, Colors, Buttons
Molecules	Combination of Atoms	Breadcrumb Navigation, Form Unit (e.g. Label + Textfield + Button)
Organisms	Combination of different Molecules and/or Atoms	Header, Footer, Full Form
Templates	Raw Page: Full Layout, No Styling, "Lorem ipsum" Content	Raw Product Overview Page
Pages	Full Page: Full Layout, Full Styling, Realistic Content	Product Overview Page with Realistic Content

Global Files

_data.json	Global Data Provider
_listItems.json	Like Global Data Provider, but for List of Items (up to 12 Items)
annotations.json	Documentation / Notes / Specification

Data Provider

Global	_data.json	Overridable	Embeddable
Style Modifier	{{> atoms-button:primary }}	?	?
Inline Parameter	{{> atoms-button("label": "Click Me!")}}	Not Overridable	?
Pattern Specific	button.json	?	?
Pseudo Pattern	button~primary.json	?	Not Embeddable
Global List Items	_listitems.json	Overridable	?
List Items	button.listitems.json	?	?

Template Syntax*

{{ label }}	Outputs value from data provider
{{{ label }}}}	Outputs HTML value from data provider
{{ img.square.url }}	Outputs nested value from data provider
{{> atoms-button }}	Includes given pattern
{{# showButtons }} {{> atoms-button }} {{/ showButtons }}	Includes given pattern when condition is met
{{# listItem.five }} {{> atoms-button }} {{/ listItems.five }}	Includes given pattern five times, always with different data

*Pattern Lab uses Mustache syntax for it's templates.

States

Undefined	buttons.mustache	no dot
In Progress	buttons@inprogress.mustache	● red dot
In Review	buttons@inreview.mustache	● yellow dot
Complete	buttons@complete.mustache	● green dot
