

Installing Packages

```
cat(".Rprofile: Setting UK
repositoryn")
r = getOption("repos") #
hard code the UK repo for CRAN
r["CRAN"] = "http://cran.
uk.R-project.org"
options(repos = r)
rm(r)
install.packages("tree")
library(tree)
```

createDataPartition

```
#It will distribute evenly the
column Species
train.flag <- createDataParti-
tion(y=iris$Species, p-
=0.5, list=FALSE)
iris[train.flag,]
iris[-train.flag,]
```
