

Basic Bootstrap CSS Classes	Basic Bootstrap CSS Classes (cont)	Non-Typography Bootstrap CSS Styles (cont)
Styling headings and body copy .h1 .h2 .h3 .h4 .h5 .h6 .small .lead (style content to stand out)	<pre> (for multiple lines of code) <pre> w/ .pre-scrollable (for much longer code) <samp> (sample output from a program)	Image Classes .img-responsive (can use with .center-block) .img-rounded .img-circle .img-thumbnail
Modifying alignment, transformation and abbreviations .text-left .text-right .text-center .text-justify .text-nowrap .text-lowercase .text-capitalize .text-uppercase .initialism	Notes: <p><abbr title="United States Air Force" class="initialism">USAF</abbr></p> http://getbootstrap.com/css/#initialism <var>y</var> = <var>m</var>-<var>x</var> + <var>b</var>	Helper Classes .text-muted .text-primary .text-success .text-warning .text-danger .bg-primary .bg-warning .bg-danger .pull-left .pull-right .center-block .clearfix .show .hidden .invisible (opacity becomes zero)
Using blockquotes <blockquote> <blockquote> w/ <footer> (for author) <blockquote> w/ .blockquote-reverse	Non-Typography Bootstrap CSS Styles Working with Bootstrap Buttons .btn btn-default .btn btn-primary .btn btn-info .btn btn-warning .btn btn-success .btn btn-danger	Responsive Utility Classes VISIBILITY-SIZE(-DISPLAY) Visibility: visible or hidden Size: xs, sm, md, lg, print Display: block, inline, inline-block, print (not necessary if visibility is hidden)
Working with list styles .list-unstyled .list-inline .dl-horizontal (for dictionary lists)	Further Bootstrap Button Subclasses .btn-lg .btn-sm .btn-block .active	Bootstrap Buttons work with <a>, <button>, <input> disabled="" <button class="btn btn-default" disabled="disabled"> (attribute) .pull-left/right don't work with navigation elements. You must use .navbar-left/right
Styling Code <code> <kbd> (Keyboard shortcut) <var> (for indicating variables)	Table Styles .table (use w/ <table> HTML element)	.text-hide comes in handy when, for example, you want to replace some headers with some images while retaining the text for SEO or semantic purposes
	Further Bootstrap Table Subclasses .table-striped .table-hover .table-condensed .table-bordered .active .success .info .warning .danger .table-responsive (use w/ .container surrounding table)
