

Node Graph		Parameters		Monitor	
Tab	Displays node creation menu, filtering names by each character typed (* works)	A (over CEL)	Appends SceneGraph Location to CEL	R/G/B/A/Y	Toggle channels / luminance
K	Tab for shading nodes only	R (over CEL)	Replace SceneGraph Location	C	RGB channels restored
J	Go > Jump to bookmark - pan/zoom the display to the chosen item	General		Tab	Toggles between Monitor/Catalog
F	Frame selected node / Frame entire nodegraph if nothing is selected	Ctrl + S	File -> Save	Ctrl + Spacebar	Maximizes Monitor Panel
A	View All nodes	Ctrl +	Save all live groups	F	Fit images to monitor window
G	Group selected nodes in a single "group" node	Shift + L		Home	Reset to 1:1
U	Ungroup a group node	Ctrl + Z	Edit -> Undo	Ctrl + Left click drag	Pixel probe
Ctrl + Enter	Go -> Enter selected group	Ctrl + R	Edit -> Redo	Alt + Up arrow/Down arrow	Adjust gamma
Ctrl + Backspace	Go <- Back out of a group (or up one level)	Esc	Cancels Renders	Lights & Render Panel	
D	Toggle the disabled state of the node	P	Render -> Render View Node	A	Add lights and filters
Q	Edit > Toggle expression link visibility	Ctrl + Shift + P	Live Render	C	Create new comp
T	Displays the node type and comments	\ (Backslash)	Render -> Re-Render Previous	R	Create new render
` (backtick)	Begin/End connections between nodes	Alt + MMB Drag	Pans any scrollable area	Viewer	
Delete	Delete selected node	Spacebar	Maximizes Panels w/focus (Exception: monitor panel will cycle through 2 renders)	Tab	Cycle through light manipulators
X	Extract selected node	Ctrl + Spacebar	Maximizes Monitor Panel	G	Toggles grid on/off
R	Replace selected node	Spacebar on Tab	Maximizes all windows	RMB (drag left/right)	Zooms
Y	Align selected node	Ctrl Tab	Cycles through tabs	Backspace	History backward
Alt + D	Disable multiple nodes	pixkatana --crash	To recover autosaved files	Shift	History forward
ESC	cancel rendering	Ctrl + B	Sticky drag	Backspace	
				T	Black background displayed
				Alt + T	Grey background displayed
