

Monitoring

```
watch -n 5 'ntpq -p'
```

Issue the 'ntpq -p' command every 5 seconds and display output

Filtering

```
egrep '(Tom|Dan) Savage' file
```

Print lines contain 'Tom Savage' or 'Dan Savage'

```
grep -irl 'keyword' *
```

Print all files name which contains *keyword* (**case-insensitive**, search from current folder **recursively**)

```
head -20 file | tail -10
```

Print lines 11 to 20 of file

Editing

```
:put=readfile('/path/to/foo/foo.c')[2:7]
```

In vi, read lines 3 to 8 in foo.c and insert the lines to current file after current cursor line

Creating

```
ln -sv target/existing/directory new_link_to_create
```

Create a soft link file to existing folder
