

Modifying rows and columns in a dataframe

Selecting 1,2,4,5 columns from a dataframe
`df <- subset(x = df, select = c(1,2, 4,5))`

Subsetting specific values from a dataframe using equation
`df <- subset(x = df, subset = df$gender == c("male", "female"))`

Subsetting specific values from a dataframe using negation
`df <- subset(x = df, subset = df$gender != c("unknown"))`

Access specific elements of a dataframe

Access column of dataframe By single square bracket
`df["col"]`

By double square bracket
`df[["col"]]`

By dollar sign `df$col`
