

Docker Workflow

Command	Effect	Link
docker image ls	list docker images	
docker [container ls ps]	list <i>running</i> containers	
docker [container ls --all ps -a]	list <i>all</i> docker containers	
docker build [tag=1abel] path	build an image from a dockerfile; path is usually . (current dir)	[build]
docker run <image>	run an image	
docker rmi <image>	remove image	[rmi]
docker rm <container>	remove container	[rm]
	connect to remote	

Compose

docker-compose up	run current compose file
docker-compose -f <filename> up	run specified compose file
-f is nice for running various configs/build processes within one project	

General Docker/Compose

Connect (interactive) to container	docker exec -it <cont name> /path/-to/shell
------------------------------------	---

npm workflow

Command	Effect	Link
npm init	generate package.json in pwd	[init]
npm i install <pkg g[, pkg]> [-P]	save prod dep to package.e.json	[install]
npm i <pkg g[, pkg]> -D	save dev dep to package.json	
npm i <pkg g[, pkg]> @1.2.3	save specific version	[semver]
