

XAML (UI layout):

```
<ContentPage
xmlns="http://schemas.microsoft.com/dotnet/2021/maui"
xmlns:x="http://schemas.microsoft.com/winfx/2009/xaml"
x:Class="MyApp.MainPage">
<StackLayout>
<!-- UI Elements go here -->
</StackLayout>
</ContentPage>
```

Use XAML to design your app's UI.

Code-Behind (C# logic):

```
public partial class MainPage :
ContentPage
{
    public MainPage()
    {
        InitializeComponent();
    }
}
```

The logic for how your app behaves is in the .cs file with the same name as your xaml page.
